AUTOMATED TINTOSTAINER

Rapid | Open | Flexible

Automated System for Anatomic Pathology

Rapid

The Bio SB automated TintoStainer is an automated solution for anatomic pathology laboratories. Ideal for labs that desire a flexible automated solution that will help minimize sample turnaround time, yet remain cost effective.

- Available in 36, 48 and 72 slide configurations.
- Rapid turn around time by processing small batches quickly.
- Integrated bar-code scanning optimizes lead time and reduces error.

Bar code based system for reagents and samples reduces instances of user-error. Software optimized for both research and clinical settings.

Open

The Bio SB Automated TintoStainer is an open system, which has the ability to use any detection system, reagent, or ancillary from any supplier. Competing automated systems from other vendors are typically more expensive and “closed”, limiting the portfolio of reagents that can be used.

- Fully open system allows you to control your own costs.
- Allows the use of antibody, reagent, and detection chemistry from any supplier.

Flexible

The Bio SB Automated TintoStainer allows you the maximum flexibility to meet your laboratories unique needs. Use any of Bio SB's validated protocols or you can create your own.

- Supports IHC, ICC, IF and detection for CISH.
- Financing and reagent acquisition programs available.
- Flexible protocol programming. Use our optimized protocols or design your own.
- Integrate the epitope retrieval system of your choice: TintoRetriever PT Module or Pressure cooker.

The Bio SB Automated TintoStainer can be custom programmed to dispense as little as 100µl of reagent per slide.

Product Description	Catalog #
TintoStainer 36 Slide (110V) with Report & Bar Code Printers	BSB 7029
TintoStainer 36 Slide (240V) with Report & Bar Code Printers	BSB 7032
TintoStainer 48 Slide (110V) with Report & Bar Code Printers	BSB 7051
TintoStainer 48 Slide (240V) with Report & Bar Code Printers	BSB 7074
TintoStainer 72 Slide (110V) with Report & Bar Code Printers	BSB 7052
TintoStainer 72 Slide (240V) with Report & Bar Code Printers	BSB 7053

TintoRetriever Pressure Cooker

- Fast & uniform epitope retrieval.
- Built in temperature gauge for validation.
- Bundled with epitope retrieval solutions.
- Low reagent requirement.
- Optional temperature validation slides.
- Multiple temperature settings.

Product Description	Catalog #
TintoRetriever Pressure Cooker	BSB 7008
Plastic Staining Dish	BSB 7009
Slide Holder (24 Slides)	BSB 7010
TintoRetriever Slide Thermometers (Pack of 5)	BSB 7005

TintoRetriever PT Module

- Intuitive and programmable touch interface.
- Slides can be quickly transferred from PT Module to TintoStainer.
- Generates epitope/nucleic acid retrieval report.
- Ideal for automated workflow environments.

Product Description	Catalog #
TintoRetriever PT Module (110V)	BSB 7030
TintoRetriever PT Module (220V)	BSB 7033

TintoStainer Accessories

For a complete list of TintoStainer accessories, contact Bio SB at info@biosb.com

Product Description	Catalog #
12ml Barcode Vials for 2-D Systems	BSB 7054
Reagent Tray with Wash Station	BSB 7055
Reagent Tray for TintoStainer 48	BSB 7056
2nd Reagent Tray for TintoStainer 72	BSB 7057

Product Description	Catalog #
Tray for Autostainer vials	BSB 7058
Reagent Barcode and Label Kit	BSB 7059
Flap Slide Label Kit & Ribbon	BSB 7060
No Flap Label and Ribbon	BSB 7061
